What is Qualitative Data Analysis?

UTMH
Universiti Tunku Hussein Cyber Malaysia

- Qualitative Data Analysis is the range of process and procedures whereby researcher move from the qualitative data that have been collected into some form of explanation, understanding or interpretation of the people and situations researcher is investigating.
- Data analysis is a process of breaking down data into smaller units, determining their importance and putting pertinent units together in a more general form.

Step 1: Raw Data Management

Inventory, organize, and label all your data.

- Devise and organizing scheme early in your study.
- Track your insight while preparing your data for analysis, including while transcribing interview.
- Keep a back of your entire data set, along with your organizing scheme.
- Data management can be manual and/or electronic.
